Our Products

We elevate security teams with intelligence-led cyber risk management solutions.

Cyber Threat Intelligence
Targeted and actionable intelligence for any use case – configurable in minutes. Real-time information around threat actors, campaigns, malware, attack patterns, tools and CVEs for faster threat detection and incident response.

External Attack Surface Management
Deep and proactive discovery of all internet-facing assets. Identify vulnerabilities and misconfigurations alongside actionable insights for high-impact remediation.

Risk-based Vulnerability Management
Automated network and cloud monitoring with risk-based scoring. Leverage real-world threat intelligence to quantify your vulnerability risk and prioritize your remediation workflow by focusing on what matters most.

Web Application Security Testing
Continuous pen testing with access to security experts for your agile development cycles. Secure your apps against OWASP Top 10 and common software weaknesses.

Continuous Threat Exposure Management (CTEM)

Outpost24 CORE provides comprehensive, unified exposure management across network and cloud infrastructure, web applications, and user access, helping security teams focus on triaging threats that matter to their business.

- Real time, 360-degree view of your exposure on a risk grading from A to F
- Integrated threat intelligence for advacned cyber risk quantification
- Continuous assessment and monitoring for actionable mitigation guidance
